EDUCATION

NANYANG TECHNOLOGICAL UNIVERSITY (NTU) **Singapore, SG**

Bachelor of Applied Computing in Finance (Hons) *– Expected Graduation: May 2029* **Aug 2025 – Present**

WORK EXPERIENCE

ENDOWUS | Business Development and Partnerships Intern — May 2026 – Present

- Automated LinkedIn Sales Navigator outreach with a Python + AI pipeline (using Playwright MCP, LLM-generated messaging), running a 328-prospect campaign at an 18.6% reply rate and scaling it across four verticals to 1,000+ prospects.
- Built client reporting dashboards in Mode (AWS Athena SQL) and automated recurring holdings and transactions reporting, querying corporate profile and related tables to surface client level data for external and internal reporting.
- Analysed account and market data using SQL to build the narratives and talking points behind client pitch decks and updated the Investor Relations deck for prospective institutional investors with sourced industry research and reconciled financials.
- Built live Bloomberg-linked Excel models (Excel add-in, BDP/BDH formulas) that auto refresh fee and AUA data across wealth platforms and asset managers, with peer-median benchmarking.
- Analyzed fee-voucher data across 213 clients against CRM records, surfacing 2026 expirations of which ~84% of clients had no advisor assigned, driving proactive client-team follow-up.

FINMECHANICS | Finance and Technology Analyst Intern — Feb 2025 - July 2025

- Performed system testing on the FM COMET FX Options Order Matching Platform (in collaboration with Clearing Corporation of India Limited), identifying logic errors and functional gaps pre-deployment.
- Applied Postgres and SQL to manage databases, run data-clearing scripts, and supported a SG Digital Banks capital markets system migration (FM Converge) in collaboration with LSEG.
- Built and analysed structured Excel test cases to validate FM Converge front-office functionality and confirm deployment-readiness.
- Mapped IR & FX Curves from front office data and validated rate curve accuracy.
- Conducted VaR validation and calculation for FX and Equities, testing system logic and functionality, strengthening system risk controls pre-client deployment.
- Built client-facing PowerPoint pitch decks, showcasing platform features, used by the sales team in product pitches to prospective clients.

LUXOFT | Risk Management Internship — Nov 2020 – Dec 2020

- Researched Liquidity Risk Management frameworks issued by Southeast Asian central banks and assisted in drafting white papers and presentation decks in PowerPoint.

PROJECTS

Undergraduate Research Assistant | NTU — *Sep 2026 – Present*

- Supporting Dr Nelson Lau (Assoc Prof) on a study of millisecond level cross-market lead-lag in equity index futures (ES vs DAX, Nikkei 225, Hang Seng, Euro Stoxx 50) and Bitcoin perpetuals across Binance, Bybit and OKX

HDB Resale Fair Value Model | [View Project]

- Trained a python ML model on 227K+ HDB resale records to predict fair prices for 3 room flats using nearby MRTs, schools and malls, flagging over and underpriced listings

ACTIVITIES & ACHIEVEMENTS

NTU Business Solutions Case Club (*Associate & Asian Business Case Competition (ABCC) Co-Chair***)** *Aug 2025 - Present*

- Completed intensive business case training covering market research, market sizing, financial projections and weekly presentations
- Leading the organization of an international case competition, developing the business case, securing and managing corporate sponsors and stakeholders, and liaising with participating universities across the globe.

Trafigura x NTU CEIT International Trading Case Competition - Merit Award & Top 16 Finalist *Sep 2026*

Susquehanna Brainteaser Battle Singapore - 3rd Place *Sep 2026*

Youth Action Challenge (YAC) Season 3 Merit Grant & Youth Panel Grant Winner *Sep 2021 – Feb 2023*
